Introduction

"PC Home" is a newly established computer shop and it decided to treat its customers with an attractive user-friendly web application. Therefore, nowadays consumers prefer to order parts online and search for information related to goods. Therefore, it has become more important for businesses to have websites that provide users with all the necessary details about product ordering processes and special deals. This development has already been completed to enhance the existing website with back-end functionalities like user management, ordering, cancellation, login, etc. Having a creative team of people who understand the art of elite system building and maintenance. A real gaming PC must be focused on Customization, Our Technical team will assist gamers to build their dreaming Monster as per their budget and choices. Our retail showroom is an open paradise for gamers where they can feel the quality and performance of any component or they can visit our dedicated online store.

During the implementation, the website developer can use different software. Here, Brackets are used. As well as use HTML, PHP, CSS, bootstraps, and JavaScript for coding for the development.
